

LIGNER & ROCHELET is a legal business consulting Firm. We propose consulting, legal and judicial representation services to our clients who are French and foreign small and medium-sized companies.

The Firm groups lawyers with complementary skills who have worked together for several years. From the beginning, the founders' ambition was to convert and consolidate this joint and successful experience for the benefit of their clients.

The Firm results from the will to share the values created by this experience and this influence is visible: team work, solidarity, availability, pragmatism and pursuing our clients' interests are the basis of our culture and approach to the files that are entrusted to us.

Since its foundation, the Firm's constant development has been used to service its organisation and clients. The LIGNER & ROCHELET Firm believes it is important to provide its clients with the added value and advantages of a human-sized legal practice.
